

E-MAIL SPAM CLASSIFIER

STEP 1: Importing Necessary Libraries

```
In [5]: import numpy as np #for numerical operations
import pandas as pd #for data manipulation & handling
from sklearn.model_selection import train_test_split #for various machine learning
from sklearn.feature_extraction.text import TfidfVectorizer #for the feature extraction
from sklearn.linear_model import LogisticRegression #popular classification algorithm
from sklearn.metrics import accuracy_score #for the evaluation of the model performance
```

STEP 2: Importing the Dataset

```
In [8]: df = pd.read_csv(r"D:\LATEST\Projects\Python_ML\mail_data.csv")
```

```
In [10]: print(df)
```
